

With a focused approach, the weeks leading up to your state test can be structured to maximize preparation efforts. Since practice work is automatically scored in Study Island, there is always a resource to show you instantly student progress with real time data. Just follow the steps below and Study Island will help you and your staff concentrate on the skills that need attention.

With multiple levels of data, administrators can see trends across the district or within a school. Teachers will be able to set priorities with their class or for individual students.

- **Identify Target Skills**

- Data Sources: by district, grade, class, group, individual
 - Study Island:
 - Sensei – Practice by Topic or Standard
 - Benchmark Test Item Analysis
 - Reports –
 - District: Suggested Topics Report
 - Grade: Weekly Campus Report
 - Class/Group: Suggested Topics Report
 - Individual Student: Suggested Topics Reports
 - External:
 - State Assessment Data

- **Create an instructional plan to fill knowledge gaps and review grade level content**

- Teacher Toolkit – locate coaching materials like:
 - Lesson Plans with PowerPoints
 - Animations
 - Khan Academy Videos
 - Virtual Labs
- Study Island Questions – project for class to:
 - model test taking strategies
 - expose students to new question types
 - discuss how to use the content to answer question

- **Develop opportunities for practice**

- Create assignments in Sensei or in Class Manager
- Allow GAME MODE

Tip: In order to play the games, students have to answer the question correctly. The instant positive feedback will keep your students motivated.

- Monitor student performance during practice sessions using Sensei or Live View

- **Track student progress – Validate effectiveness of review and practice**

Tip: Use the date filter for the Study Island Reports to isolate data from Boot Camp

- **Create an reward system based upon:**

- Number of blue ribbons earned for targeted skills
- Highest game score
